

Simplifying Data Protection

Vembu BDR Suite

Vembu BDR Suite simplifies data protection with its comprehensive Backup and Disaster Recovery solutions that can protect diverse IT environments from physical machines to virtual workloads. You can backup on a granular level with File or Application level backups or you can have image-based backup of your physical machines while an agentless solution can be used to backup your virtual machines.

From a single console, you can perform and manage all your backup and recovery operations for your virtual and physical machine backups. With intricate backup scheduling and instant data recovery options, Vembu delivers industry-best Recovery Point Objective (RPO) and Recovery Time Objective (RTO) of less than 15 minutes.

A solid DR plan can also be deployed with Vembu BDR Suite to protect your backup data with Vembu's two options - Store a secondary backup copy in your datacenter at a DR site or in Vembu Cloud. This comprehensive suite of products that can handle your diverse backup needs, makes your data protection and disaster recovery policy hassle-free.

Improved Scalability

Faster Restores

Better Management

Customer Quotes

"We have used Vembu product for years, starting with its hybrid-cloud backup solutions and like it for its ease to deploy, ease to manage, ease to invoicing, and broad set of scalable offerings from simple file backup up to BCP product lines."

-Lee Wong Manager of Information Technology at The Mackie Group

"Vembu have been a valued partner since starting to use the product around 5 years ago. We've consistently seen improvements and upgrades as needed. When we've had problems they've been there to help, no hard sales and no fuss."

-Alan Morris Head of Technical Services, Cyngor Sir CEREDIGION County Council

VMware Backup & Replication

Agentless VMware Backup & Replication to protect the VMs hosted on VMware ESXi host and vCenter server environments.

- Quick VM Recovery
- Cross-Hypervisor migration
- Failover & Failback

Hyper-V Backup

Simplified data protection for Hyper-V environment through host-level backups, high performance changed block tracking and instant restore capabilities.

- Backup VMs on Hyper-V Cluster, CSV & SMB share
- Quick VM Recovery
- Granular recovery of files & applications

Windows Image Backup

Ensure complete protection for physical Windows Servers & Workstations through disk-image backup.

- Changed Block Tracking
- Bare Metal Recovery
- Physical to Virtual migration (P2V)

Monitoring & Management

Vembu BDR360

Centralized tool for monitoring that provides end-to-end visibility to all the backup jobs configured using the Vembu BDR Suite with features like:

- Email Alerts
- Instant Notifications
- Group Management
- Image Verification Reports

Vembu Portal

It is an all-in-one portal to register & manage Vembu Products & Services with the options like:

- Billing
- Invoice
- Licensing
- Account Management

File & Application Backup

Protect your data across File servers, Application servers and Workstations that are Windows, Linux and Mac based OS.

- Continuous Data Protection
- Backup data from local & network drives
- Backup of MS Exchange, SQL, Sharepoint, Outlook & MySQL

Offsite DR

Ensure double protection to your critical data with Vembu OffsiteDR, which allows you to replicate your data to an offsite location.

- Live replication to an offsite server
- WAN optimization
- Bandwidth throttling
